Comments: DO NOT open the Tongass area. No roads should ever be allowed in this area CROWN JEWEL legacy to all. The Forest Service has already lost over one billion dollars in Tongass timber sales due to guaranteed low prices of the past. Not only is this rule bad for taxpayers who will subsidize maintenance of the road system, the 17 million acres should be permanently protected from any resource extraction. Any privately own corporation transference should be resended and Tongass should return to public trust and protected for all future generations.
