First name: Mark

Last name: Porter

Organization:

Title:

Comments: I do not believe that our national forests should be opened to commercial logging. Our natural spaces should be treasured and protected. The USA owns some of the most pristine natural habitats in the world, they should remain open to the public for the public to enjoy and should not be destroyed by commercial logging. I am HIGHLY against any logging in any of our national forests.

Thanks,

Mark Porter
