Title:

Comments: Alternative 1 takes no action and would leave all of Alaska under the 2001 Roadless Rule, including the Tongass National Forest.

I am in full support of the roadless rule. With nature quickly disappearing and global warming speeding up...it is crucial that we protect all of the nature that we can. There must be ways of increasing the economy by improving the environment, protecting nature and saving the planet. There are other places in the world that live well and have made drastic changes to head in the right direction toward saving the planet. There is no reason why we can't do the same :)

Thank you for hearing my opinion
