Comments: To Whom It May Concern,

I am writing to implore the Forest Service to maintain the pristine nature of the Tongass National Forest by not allowing any new roads to enable logging. Logging in this incredible habitat would release a huge amount of stored carbon into the environment and contribute to global warming. I would have thought it was ultimate mission of the Forest Service to protect America's great forests and preserve them for future generations not sell them off for temporary gain. Please, please, please do what is right for the world.

Thank you.

Donna Corbin
