Comments: The Route 8065 in Alternative 1 is a non-engineered collection of routes which will need to be developed if they are to become a safe path for any motorized vehicle. Further, the steep forested terrain with several springs is a unique biological area north of Alpine. It is recommended that this route and the associated extensions 8065ATV and 8066ATV (in Alternative 2) be closed. Because of the water, burned trees, steep terrain, and location at the base of Terry Flats, maintaining these routes will cost the Forest Service over \$2000 annually. Finally, this route does not extend the ATV options for non-highway legal ATVs to a new ATV trail system. For highway legal ATVs, the Terry Flat loop can be accessed by driving on the US 180 for a 1/2 mile.
