Comments: I support Option 1. Leave this land as it is. My God, have you no conscience. Have your people not done a REAL Environmental Impact Study?? Common sense will show that disturbing this ecosystem will change everything in it. PLEASE, stop listening to the greedy corporations and oil people. They have no one in concern but their own profits. This is one of the most egregious violations of Environmental protections I have seen yet, under this administration. I might add, the people that are pushing this are not from this area and probably have NEVER been to this area. So it doesn't concern them that they will be destroying a Beautiful and Fragile Environment. STOP THIS MADNESS!!! Thank You.
