Comments: To whom it may concern,

I strongly oppose the bill to begin logging in the National Forest. Although you may not believe in global warming or what this type of destruction does to throw off the balance of the ecosystem...but I assure you, those things are very real. Therefore our planet cannot afford another devastating project like this. You will be disturbing more than you know. Educate yourselves on the environment and actually have a soul and a heart to care about the environment and actually protect it!!! Don't be a fool. This project needs to go away!
