Comments: In regards to Alaska Roadless Rulemaking #54511, please vote to keep the existing roadless rule protections in place for this critically important piece of the natural world. The communities that currently inhabit this area have already had to devise a way to make a living without exploiting the natural resources that surround them. The vast majority of monetary benefits will not support the local people, and will only be temporary. Please leave the roadless rule in place to protect all that is holy and special about this great country we live in.
