Comments: USDA Forest Service,

I strongly oppose "Alternative 6" and support "Alternative 2" as an approach to balance industry aspirations with the conservation of America's largest temperate rain forest. Alaska is warming faster than any other state in the country and its forest and water resources should not be stressed by extensive logging and road creation. Alternative 6 would be a disaster for the integrity of the old growth forest ecosystem and the valuable natural resources (e.g., salmon) that depend on this ecosystem for persistence in the face of dramatic environmental change. Please protect public lands for all Americans, not just vocal resource extraction companies.
