Comments: I do not support the building of roads in the Tongas National Forest.

Do not despoil the Alaskan wilderness for short-term development like logging, mining and drilling. Resources such as oil, minerals and timber can be found elsewhere, unlike the unique, pristine wilderness of the Tongas National Forest. America's natural lands are essential to our heritage and the national endowment we leave to our children and grandchildren. We already have too few of these unspoiled, natural landscapes left. Protect the Tongas. No new roads!
