First name: Carrie

Last name: Megill

Organization:

Title:

Comments: Please do not allow road building in this forest. It was protected for a reason. It needs to remain as pristine as possible, not just for this country but for the health of the world. The short term financial gains the current President wants do not take into consideration the health or well being of the environment and all living in it - including people.

Please be one of the few agencies to stand up to this pressure and continue to protect this forest as stringently as possible.
