Title:

Comments: This is a most humble and sincere plea to please leave the Tongass forest alone. We humans have pillaged everything on this planet. Remember we are not the only ones here. Just because the precious and beautiful forests and wildlife can't speak for themselves and can't punish anyone for hurting and killing them we humans think we can do absolutely anything we want to fulfill our endless greed for money and limitless desires. Everybody has an equal right. These forests harbor a very delicate ecosystem. They are the animals' only home. Please let them be. They have nowhere to go. We've taken EVERYTHING from them. We destroy forests, hunt and kill animals, eat meat and do everything for ourselves. We don't do anything that's selfless and that even remotely helps someone else. Please, when the forests die everything dies. The wildlife will go extinct! Please don't let this travesty happen! We've ruined and burned our Mother Earth enough! Please stop now! Let the forests and the innocent wildlife live in peace and heal! Do not permit logging and development in the Tongass forest! Please I beg you! Leave it alone and find it in your heart to do the right thing! During your last moments, you'll feel your life wasn't in vain...
