Comments: I don't believe this is a good deal for the tax payers and residents of Montana. This lower now public land is a recreational area for outdoor enthusiasts in our state and a needed property for for wildlife and conservation thereof. This is a deal that needs to be voted on by the tact payers of the state not a deal made by the government "in best interest" of the tax payers. It is all about the money when the government decides what is best. I strongly oppose this deal and will be an active member of any and all lawsuits brought forth if this deal goes through.
