Title:

Comments: Thank you for the chance to comment on the Crazy Mountain land exchange. As a 20 year veteran guide in Yellowstone, I speak often of the Greater Yellowstone Ecosystem, and the critical importance of connectivity. I fully support this measure--it dovetails with bigger goals for consolidated public lands and decreases the archaic, damaging checkerboard in place now. It also attends to habitat and wildlife concerns for grizzlies, wolverines, native trout and so many more that work under these umbrella species. This exchange also increases public access to the southern end of the range. For all of the reasons listed and more, I appreciate the Forest Services efforts to galvanize this big move and fully support the effort. THANK YOU!
