Comments: How can you even consider closing off over a million acres of land to the good people of Arizona!? We are naturally landlocked, and suffer from some of the lowest percentage of privately owned land in the ENTIRE USA. I question your intent, and your motives. I do not mean to be cruel or insulting, but this looks wrong on every level, including legally. This is public land. OUR land. It needs to be shared by all. As someone who is getting older, this includes motorized recreation to access this land.

Please stop with the land closures. This is not nazi Germany. This is our land.
