Comments: I attended the meeting on 10/23 in Alpine. It is very concerning that you don't have a plan on how to enforce any plan that you have put suggested. I would like to see Alt #3. We don't need more roads that you can't maintain or enforce. You do need to add into issue #2 of Big game retrieval into option 3. You don't have enforcement to protect the forest and game but you want to add more trails. You know that they will not just stay on those trails and they will not pick up a map. What You have not addressed the watershed issue. I have water rights and I pay for them and you want to add more roads and not protect the water rights of those down stream. I heard load and clear last night that you don't have the funds to maintain and protect today and you won't have it tomorrow. The forest is for all of us, not just the ATV or UTV's. Today you put out unattended campfires and now you want to let them go wherever and camp, but what about those of us that live next to the forest and when that fire comes, will you protect my home and animals? I understand that this is not easy but I live here and you want to put additional roads and ATV trails that will destroy and damage our forest. There are enough roads, I don't think we have a traffic jam yet. Do option 3 with the addition with big game retrieval. This is OUR national forest and we need to make sure it's here in the best shape for our future generations.
