Title:

Comments: Alaska

Please vote for option 1, no change!

Pillaging of our natural resources such as ancient forests, merely for the sake of logging, is an ATROCITY. It cannot be undone.

This is not how we want to move into the future, barren and wasted.

We need to think in new and creative ways to solve our evolving needs, as well as the problems we've created by burying our heads in the sand.

Let us lead by LEADING, not by trailing behind.

Protect Alaska and protect the world's ecosystem.
