Comments: Tongas National Forest

It is my hope that this email will somehow reach #@realDonaldTrump. It is beyond comprehension how you can be contemplating opening up Tongas National Forest to commercial logging. Our National Parks, Forests, Monuments, conservation and historical projects are our national treasures. They should NEVER be open to the greed & destruction of corporate America. Big oil, big mining, big (& dirty) coal, big lumber have no business destroying what is beautiful and natural. The National Park Service should be protected, preserved and expanded.

Sincerely,

Nancy L. Kovach

Stow, Ohio
