Comments: Comments to oppose modification to the Roadless Rule

Dear U.S. Forest Service,

I strongly urge that the Tongass National Forest should not be opened to logging and other intrusions. Not only will the ecosystem for animals of many kinds be ruined, but the temperate rainforest is a sink for carbon, which should not be disturbed by cutting, road building, etc. Our earth is already threatened by man-made carbon pollution. Let's keep carbon sequestered in the forest! Don't add it to the pollution that is causing climate change.

The Roadless Rule helps protect old-growth habitat for birds like the Prince of Wales Spruce Grouse and Northern Goshawk, as well as for mammals like wolves and deer. Opening roadless areas to more logging and roads will fragment the forest and eliminate more of the big old trees that these animals rely on.

Yet, all of the action alternatives in the Draft Environmental Impact Statement allow more roadbuilding and logging across the Tongass National Forest. Logging roads and timber operations cost tens of millions of taxpayer dollars every year, with zero return on investment. Meanwhile, these destructive activities degrade the naturally sustainable wealth of salmon, wildlife watching, and tourism opportunities.

It is time to stop opening more and more acres to the timber industry and instead bolster protections to the old-growth forests and wild areas on the Tongass. I urge you to select the "No Action" Alternative (Alternative 1) and allow the Roadless Rule to remain intact on the Tongass National Forest.

Sincerely,

Deborah Stewart

Seattle, WA 98103
