Comments: Comments to oppose modification to the Roadless Rule

Dear U.S. Forest Service,

The Roadless Rule helps protect old-growth habitat for birds as well as for mammals like wolves and deer. Opening roadless areas to more logging and roads will fragment the forest and eliminate more of the big old trees that these animals rely on.

Yet, all of the action alternatives in the Draft Environmental Impact Statement allow more roadbuilding and logging across the Tongass National Forest. Logging roads and timber operations cost tens of millions of taxpayer dollars every year, with zero return on investment. Meanwhile, these destructive activities degrade the naturally sustainable wealth of salmon, wildlife watching, and tourism opportunities. We need the full biodiversity of wilderness areas to combat the effects of climate change and protect our biological life support. This has to take priority over commercial interests.

It is time to stop opening more and more acres to the timber industry and instead bolster protections to the old-growth forests and wild areas on the Tongass. I urge you to select the "No Action" Alternative (Alternative 1) and allow the Roadless Rule to remain intact on the Tongass National Forest.

Sincerely,

Dorothea Leicher

Columbia Cross Roads, PA 16914
