First name: David Milan

Last name: Dunlap

Organization: U.S.F.S. Colorado / I.P.Co. / Boise Cascade Corp , SC / Retired

Title:

Comments: Road building and development in adverse terrain ? - more Fed money wasted. If passed, the requirement and practice has to respect what Mother Nature has to offer- i.e. utilize high lead logging or helicopter logging on an old growth, thinning operation on a 20 year rotation in order to preserve upcoming undergrowth,wildlife, creeks/rivers (with 150ft vertical buffer) followed by site reclamation and road construction restrictions.Keep the development off and restrict road building to required logging operations. This is THE LAST FOREST "WE" have to protect - dont waste it on the shoulders of your grandchildren by building a home for a family you do not know . Thank you, D.M.Dunlap 1974 Okla State Univ , Forest Management Graduate
