Title:

Comments: Please keep the Forest unmolested. We as a population have over expanded enough already. The very things this nation were founded on (hunting, fishing, trapping) are the things you are currently wanting to destroy. There are already more than 9 million acres of Public and BLM land that we, the public that pays for the land, cannot access. 9 MILLION ACRES! Now here is a proposal to completely rip parts away. If logging is so important than log your private lands. If you can afford to lose \$600 million on logging, obviously you arent in need of money. Logging destroyed every place ive grown up hunting. Now for 75 miles around me are nothing but pine thickets and track marks on the dirt
