Comments: I have studied this topic from all perspectives. I am a big fan of sustainable logging and also spending time in nature's beauty. There are very few places left in the World that are as beautiful, diverse and seemingly untouched as the Tongass NF. There are a lot of places that are much better suited to clear/selective cutting of timber for resource management or fire prevention. Please don't mess with the Tongass and the Flora and Fauna that are so heavily reliant on it's predominantly untouched mature forest system. Leave the wild, wild at Tongass NF.
