Comments: You need to leave this alone. We sit and watch the global warming issues and everyone wants to say how do we stop all this. We come up with more stringent climate policies thru the EPA and other agencies yet we still want to log.

Some will say this is just a small portion of logs but where does it stop? At what point do we say no..

In true American fashion if we allow this logging it will lead to much more logging up there and by the time we realize what we are doing it will be to late.
