First name: Martha

Last name: Burns

Organization:

Title:

Comments: There is absolutely no good reason to cut down these trees. The world is in a climate crisis and we need every tree standing that we have. Logging is a dying industry and needs to be reformed around sustainable practices or go the way of the oil industry. It is unacceptable to use public lands that are supposed to have been conserved for our future generations to enjoy for profit. It is unacceptable to use these natural resources that were preserved for us by our forefathers and that we should be preserving for our children.
