Comments: Please stop!!! We need to come up with solutions, other than destroying our climate, nature, and/or ourselves. Use hemp instead of trees. Which will at least allow for at least some time for repopulation of trees to be replaced. At the pace these companies are progressing, and demand for more, and more supplies you are condemning all!!! Take the trees out of your own backyards!!! Not everyone else's, or nature's!!! Too many being destroyed not only for industrial purposes, but wildfires alone have placed us all in danger already!!! Wake up people you are destroying the only home we have. Without it nothing matters!!! God help us all!!!
