Title:

Comments: This pristine Forrest should protected at all cost from mans intrusion. There is no justifiable demand or need to deface such a wonderful monument. This land is a symbol of what our country once was and acts as a picture of the past. This Forrest is also a flourishing wildlife preserve where animals can roam as they were 200s of years ago. This is important to save our Forrests it brings us closer to nature and our nations children have a right to see and use these great places!
