Comments: I strongly support Alternative 6 which exempts the Tongass National Forest from the 2001 Roadless Rule and is fully responsive to the State of Alaskas petition. Having hiked in and studied the Tongass Wilderness, I have some sense of how important this land tract is to native species habitats as well as migratory bird populations. In this time of global climate change when threats to our native wilderness are high, we need to be a voice for those elements of that wilderness that have no voice--the trees, under and overstory, the animals, birds, and aquatic life that live within it. Please protect this precious resource!!
