

Data Submitted (UTC 11): 10/21/2019 8:00:00 AM

First name: Thomas

Last name: Brickner

Organization: Rochelle wildlife and conservartion club

Title:

Comments: Just don't get too carried away with opening up this area to logging and make sure that the companies that do this logging file and follow a re-forestration plan. Also do not allow clear cutting because this is not only unsightly but, also harmful to the ecology of the areas to be logged. Clear cutting is harmful to wildlife and also allows erosion and causes damage to other plant life. remember it took many many years for these trees to grow and they cannot be replaced over night.
