Title:

Comments: Please do not open the roadless areas of the Tongass National Forest to logging. Independent studies have shown that the Forestry Service has continued to lose money, up to \$600 million dollars through previous logging services. There is no reason to disrupt and potentially destroy a national treasure as the Tongass National Forest. Once this area has been opened up to logging, it will never be the same as it is now or in the past. Thank you for your consideration.
