Comments: Decision such as this create a very important precedent. Once this land is opened and previous protections removed, what will stop the next? This is a major threat to protected land and if this atrocity is allowed to happen, who will it benefit? Very few. To take away something that benefits so many humans, animals and our countrys environmental health for the financial gain of a relatively small number of people is a true crime. Do not allow this to happen, it Needs to stop here!
