First name: Catherine

Last name: smith

Organization:

Title:

Comments: Find a new way to make a living. We need forest and diversity for a healthy earth which is our sustenance. As humans and all natural beings we need a healthy earth. Keeping these areas road-free is essential to this preservation. I vote no on any more logging and most especially any development. Move if you cant find work, thats how life is for everyone else. Save this planet for our children and their children and their children. You dont have to be a genius to know this to your core.
