Comments: I wish to comment on the Alaska Roadless Rulemaking #54511.

I believe Alternative #1 is the only good choice because it's the only one that spares old-growth forests. I believe they are the most valuable resource in our park system, the best environments for wildlife and the main reason these parks were established. Income for the state may come and go, but these forests cannot be replaced if they're cut down, and there's no evidence that the general population of Alaska would benefit from this increased logging more than the special interests who promoted it.

Sincerely,

Elisa Bernstein
