Comments: this plan is all about money, assault, selfishness and greed. forests need to grow slowly with trees picking each other not being forced into producing what sells at the lumber mill. trees should grow slowly in concert with other trees not by brutal assault by profiteers usfw. this new plan is an assault on the forest. its doomed and will require restoration after restoration on taxpayer dollars. this plan turns our forest into a lumberjacks wet dream. the u.s public is being lied to by the brutal assaulter employees of the usfw to whom money, greed, selfishness is the first order of our national land. it is a horror to behold. vote no on this brutish plan. forests should be given time to grow naturally. this is assault and will kill every animal that is trying to stay alive in this area because they will be forced out of their homes. this is an assault for money. it stinks and sucks. the usfs is not a benevolent caretaker and steward of our national lands. it is a moneymaking profiteer assaulting nature. it is so sad to have such people in charge of lands belonging to 328 million americans whose kids will suffer from their national lands being used as lumberyards.
