First name: James

Last name: Armbrust

Organization: Southeastern Arizona Sportsmens Club

Title: Board member

Comments: Our family has utilized most all of the secondary roads in units 27 and 1 for more than the last 50 years to enjoy fishing, hunting, and other outdoor activities in the National Forest. USFS intentions to close a significant amount of these roads widely used by the public will be very discriminatory to those up in age (like me), as well as our children, that do not have normal foot mobility. Please consider all age groups as you go forward with road closing considerations in areas with strong recreational interest to the public. After all, you have already closed off numerous roads of prime interest in recent years, which has resulted in unintentional consequences from outdoor enthusiasts that normally want to do what is right for our forest.
