Comments: My family has for years been one who live to camp, hike, and ride our UTV's on all the back roads of this great state. Each year it seems that more and more roads get closed off, and our ability to enjoy and be in these beautiful and exciting places are being limited. Please don't close off these areas that have become treasures to us and our citizens who enjoy the peace and quiet of nature., and see the wild life . This is our land, we are part of this great state and want to continue to enjoy it with family and friends. Thanks, Louise
