Title:

Comments: I am in favor of Alternative 1 because this is the peoples forest and the forest service needs to get back to doing what the intent of the forest service was not policing our land as this would do. Another reason for my support of no change is there is nothing mentioned in any of the other plans that addresses personal fire wood cutting which is how many of us heat our homes in the winter and it helps clean the forest up. The camping restrictions on the other 2 plans don't really allow people to get out and enjoy there national forest. I also feel that during hunting many of our game animals will not be recovered do to the restricted access even deer can be a job to get out in a timely manner before the meat goes bad. The two other plans would also hurt our local businesses because of the tourism wouldn't be as good because of the restricted access to the forest and camping locations. Remember this is our forest not the federal governments don't try and close us out of it !!!!!!!!!
