Title:

Comments: I am writing to express preference for Alternative 1, which keeps the roadless rule in place and prevents logging of the old growth forest. Due to the irreplaceable nature of the old growth forests and their vital role in the local ecosystem, we should preserve as much of their habitat as possible. There are many sustainable alternatives to logging this beautiful and pristine part of the world, and Tongass NF has far more economic value as a protected space than as an extracted resource.
