Last name: Palmer

Organization:

Title:

Comments: I oppose road building in any forest which is currently protected. New roads lead to degradatation of the environment I every way. I am currently working in kdovo, and see every day what a lack of environmental regulation and protection mean to forests, wildlife, water quality and quality of human life. No amount of money can buy back a virgin forest. A single road in a remote area leads to illegal logging, poaching and crime. Forests are being destroyed worldwide. Let the US show some leadership and protect Alaska's - and all US- forests. I especially urge protection of old growth forests. But really, we should be preserving more areas, not fewer.
