First name: Jonathan

Last name: Smart

Organization:

Title:

Comments: Alternative 1 (takes no action and would leave all of Alaska under the 2001 Roadless Rule, including the Tongass National Forest) is the only acceptable option. As our world is facing imminent, widespread effects of climate change, preserving remaining old growth forests is imperative both ecologically and ethically for all US and world citizens. It would be a crime against our great nation to turn this precious resource over to be nothing more than timber.
