Comments: For 14 years, we have been fighting against the Forest service passing TMR. It is an absolute breach of the rights of the citizens of the USA.

The Forest Service personnel who have presented the proposals in the dozens of meetings we have attended are people who have no personal stake in the area of the A/S forests. Each time we beat you on the TMR, you send in a new group of thugs to go at it again.

Those FS employees you send in have no emotional ties, no historical ties, no family ties, no cultural ties, or educational ties what so ever to this area. They have no idea what roads are on the mountain, where they go, what resources the make available to the citizens, what generational traditions are carried on there, or what financial catastrophe they will cause by closing these forests.

The government acts as though they are so ready to pander to the cultural traditions of what ever race or ethnicity they like, with total disregard for mine, but my cultures and traditions are just as important and deeply engrained after several generations here, as those whose ancestry here is hundreds or a thousand years old. You have no right to destroy our way of life, our lively-hood, our dreams, and our chance to pass on our way of life and cultures to our children and grandchildren because of the dictates of the liberal dictator at the head of the Forest Service. One person being able to dictate the closure of access to almost all of the forests in the United States is lunacy!
