Comments: I am commenting on the Crazy Mt land exchange. I spent my career working to protect and enhance public lands and the federal agencies need to do all they can to protect our lands. The majority of your proposed land exchange would facilitate public access except the exchange of sections 4 & 8. These sections are accessed by FS trail 270 and 272 and should therefore be excluded from the exchange. Montana is losing an exorbitant amount of public land access from private landowners. Please do your part in maintaining this public access by not exchanging sections 4 & 8.
