Last name: Lely

Organization:

Title:

Comments: I'm sure you all are bright enough to realize that any comment that includes "we the people" is meant as "I the person" and they should be seen through that filter. "We the people" are a diverse group with diverse desires. I am a licensed driver, also an avid hiker, also an avid bicyclist. I like driving forest roads, I like hiking thru a forest without being driven over by "off-roaders". I like riding my bike down elk trails as well as maintained trails, and it has no motor! I have walked up, and ridden up, on, and have seen sights that you will never see from the seat of your ATV/UTV.

You all make it sound like the forest is going to be closed. It is not, regardless the Alternative chosen. Try to imagine what would happen if there was unlimited grazing, unlimited mining, unlimited logging, unlimited firewood cutting, unlimited hunting, unlimited off-road travel, unlimited everything. Sound good to you? Your precious forest would be gone in less than a decade. The ASNF is trying to effectively manage YOUR forest. Try helping them out instead of telling them they are they are the problem!
