Comments: I strongly oppose the South Crazy Mountains Land Exchange #56687, specifically the new proposed trail location of trail 272. The new trail results in more difficult access to the public land sections 4 & 8 along the western front of the crazy mountains which is more easily accessed via the current approved trail. We should not be making deals like this that make access to public lands more difficult than the access in the current state.

THE trade off of access to the landlocked sections is not fair or equitable. Those sections are far less visited than those of Sections 4 & 8. Please protect the access we currently have via trail 272 to these special public lands.
