Comments: I oppose the exchange of public land sections 4 and 8 (Township 2 N., Range 11 E.) for private sections 11, 13 and 21 (Township 3 N., Range 11 E.). Although the Custer Gallatin NF is trying to consolidate public lands, trading these section would lessen the quality of potential experience for recreationists. Section 4 and 8 provide legal accessibility already and are very scenic landscapes sought after by recreationists hunting, fishing, backpacking, and bird watching. This landscape is very unique and the opportunity for people to experience it is very important for all montanans.
