Comments: First, camping, riding ATV,s and other family fun activities have always been done off road. They should be able to do this more than 30 feet off of the road. Why make it difficult for families to participate in wholesome activities? The forests are there for us to spend time in and appreciate. How do we teach the next generation to be grateful for the woods if we can't take them out in it? Most people in our area heat their homes with wood stoves and get their firewood off road. We should continue to have access to the existing roads and trails. This will also help with preventing forest wildfires. Next, all animals should be allowed to be retrieved without the proposed limitations. This can be difficult and inconvenient for the elderly and others. Lastly, the public was only notified a few days ago of the travel plan and needs more time to comment. Please extend the comment period in order to give a fair timeline to the community.
