Title:

Comments: For the love of our country, our culture, and our childrens' futures please reject this change to the Alaska Roadless Rule. If the Tongass is converted to harvestable timber this will kill us. As an Alaskan who has grown up in Southeast Alaska this move to harvest old growth is not only a callous and erroneous political move hidden under the guise of economic growth but will only further accelerate the devastation climate change is causing to me and my people. Please protect the Tongass from a failing industry. Show some backbone and please listen to our cries for help.

Sincerely,

An Alaskan who doesn't want to see his home burn from the greed of others.
