First name: Suzanne

Last name: Diesen

Organization: Private

Title:

Comments: I am opposed to this logging and consequently habitat destruction. Climate change is exacerbated by cutting down our primal forests- for what? Money? To support unrestrained growth of a destructive specie, namely, humans? How does the earth benefit in any way from us? The life giving oxygen and biodiversity is being destroyed by burning the Amazon as we speak. Now this? This is a wrong path to follow. Our current administration must go, along with the cronies that support such practices as loosening clean air standards. Big business is not life supporting. Please do not log the Tongas.
