Comments: I am a lifetime resident of Montana, grew up in Lewistown .My family would drive the 2 hours ,one way to go camping in the Crazies in the 60's.why? because it is a special place. The checker board ownership in this Range of mountains never made any sense to me , these lands should all be part of public ownership. I think the forest service should have purchased those lands back from the railroad a long time ago. The ranches that owned those in holdings , back in the old days , allowed public access, that is rapidly changing.Obviously those new owners are wealthy out of states who not only, don't allow access, but also are pressuring the forest service to sell them more of our public land !! Do not buckle under their corrupting pressure! Those lands should remain in the public ownership.We need to expand public ownership in the Crazies not shrink it !!
