Comments: Sir's or mam's

After looking at the parcels we would receive what be short of criminal..The sections from PM are shale, rock, with little of any big game habitat and access would be some of the hardest to get to on the southern end. Both sections we would be giving up are prime elk hunting spots for sportsmen with the some of the easiest access in the crazy's. I'm 60 years old in great shape but taking away prime elk habitat and land that can be accessed by somebody my age is just plain wrong. Who ever drew up this land swap unfortunately doesn't know the logistics or really doesn't care about people and seniors like my self. Access to a couple high mtn lakes is only going to be for the younger crowd and neglect the older crowd. At 60 I've raised three daughters got all of them through college on a modest income and learned much in my life especially about comman sence. College professors unfortunately can't teach it and this is what we come up too. Get your hiking boots on and walk every mile of these parcels and God willing you will do the right thing for Montanans and not big brother in DC that could care less. I've always learned about the land by hiking and talking to older people that know a lot more then me. Please do what I ask and walk this land and I believe you will do the right thing.

Thank You
